**OPOLSKIE**  
FLOURISHING OPOLSKIE REGION

## Opolskie voivodeship – European region in Southern Poland

Opolskie voivodeship is a region that draws its strength from a multinational heritage. The most important trade routes in Central Europe crossed there their paths for centuries while local traditions were shaped by Germans, Poles and Czechs.

This extraordinary geographic position on the crossroad of different paths of cultures has a strong influence on the region from the economical aspect. Residents of Opolskie stand out for their diligence, commitment to tradition and openness to the world. Businesses generally praise the high level of work ethic, education and involvement of employees in local companies. A relatively high German minority (about 10% of the total population) also means a better connectivity to German, Austrian and Swiss markets.

Local administration and authorities have been successfully attracting investors in these years and are currently developing necessary infrastructure to attract even more. Attractive investment areas are available along A4 motorway, linking Opole with Wrocław, Katowice and Kraków, as well as the markets of Germany and Ukraine.

Opolskie voivodeship enjoys a reputation among foreign investors, particularly in the food processing, chemical, metal hardware and construction sectors. According to recent analysis by Deloitte, the region can expect new investment projects in the automotive, engineering, food, glass, chemical, paper and R&D sectors.

The region is renowned for its high life standard and flourishing academic center. Local residents and investors have a wide choice of active leisure and resting options.

## Human Capital

Labor market in Poland and in Opolskie voivodeship are characterized by high efficiency and low operating costs. According to Eurostat, cost per hour in Poland is 7.4 EUR, while the average in EU is 23.4 EUR and for the Euro area is 28 EUR. The average wage in Opolskie is 91.2% of the national average. As is shown by a research of the European Federation of Employers (FedEE), Poland is the most attractive country for investment in terms of human resources in Europe.

## Automotive cluster Silesia Automotive

Silesia Automotive, a networking initiative in the Automotive sector in Southern Poland which facilitates cooperation between over 250 entities from three neighboring regions (Silesia, Opolskie and the Małopolskie Region), which include: enterprises (vehicle manufacturers, producers of motors and other car parts, components and systems), Universities of Technology such as the Silesian University of Technology, Czestochowa University of Technology, University of Bielsko-Biala, Scientific entities such as the Institute of Non-ferrous Metals, Institute for Ferrous Metallurgy, Institute of Welding in Gliwice (Polish Welding Centre of Excellence), Technical schools, Specialized service suppliers.

The activities of Silesia Automotive are focused around two main issues:

- human resources & labor market
- innovations (new materials and engineering solutions).

The actions that are taken include:

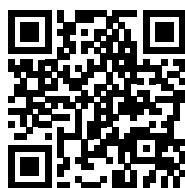

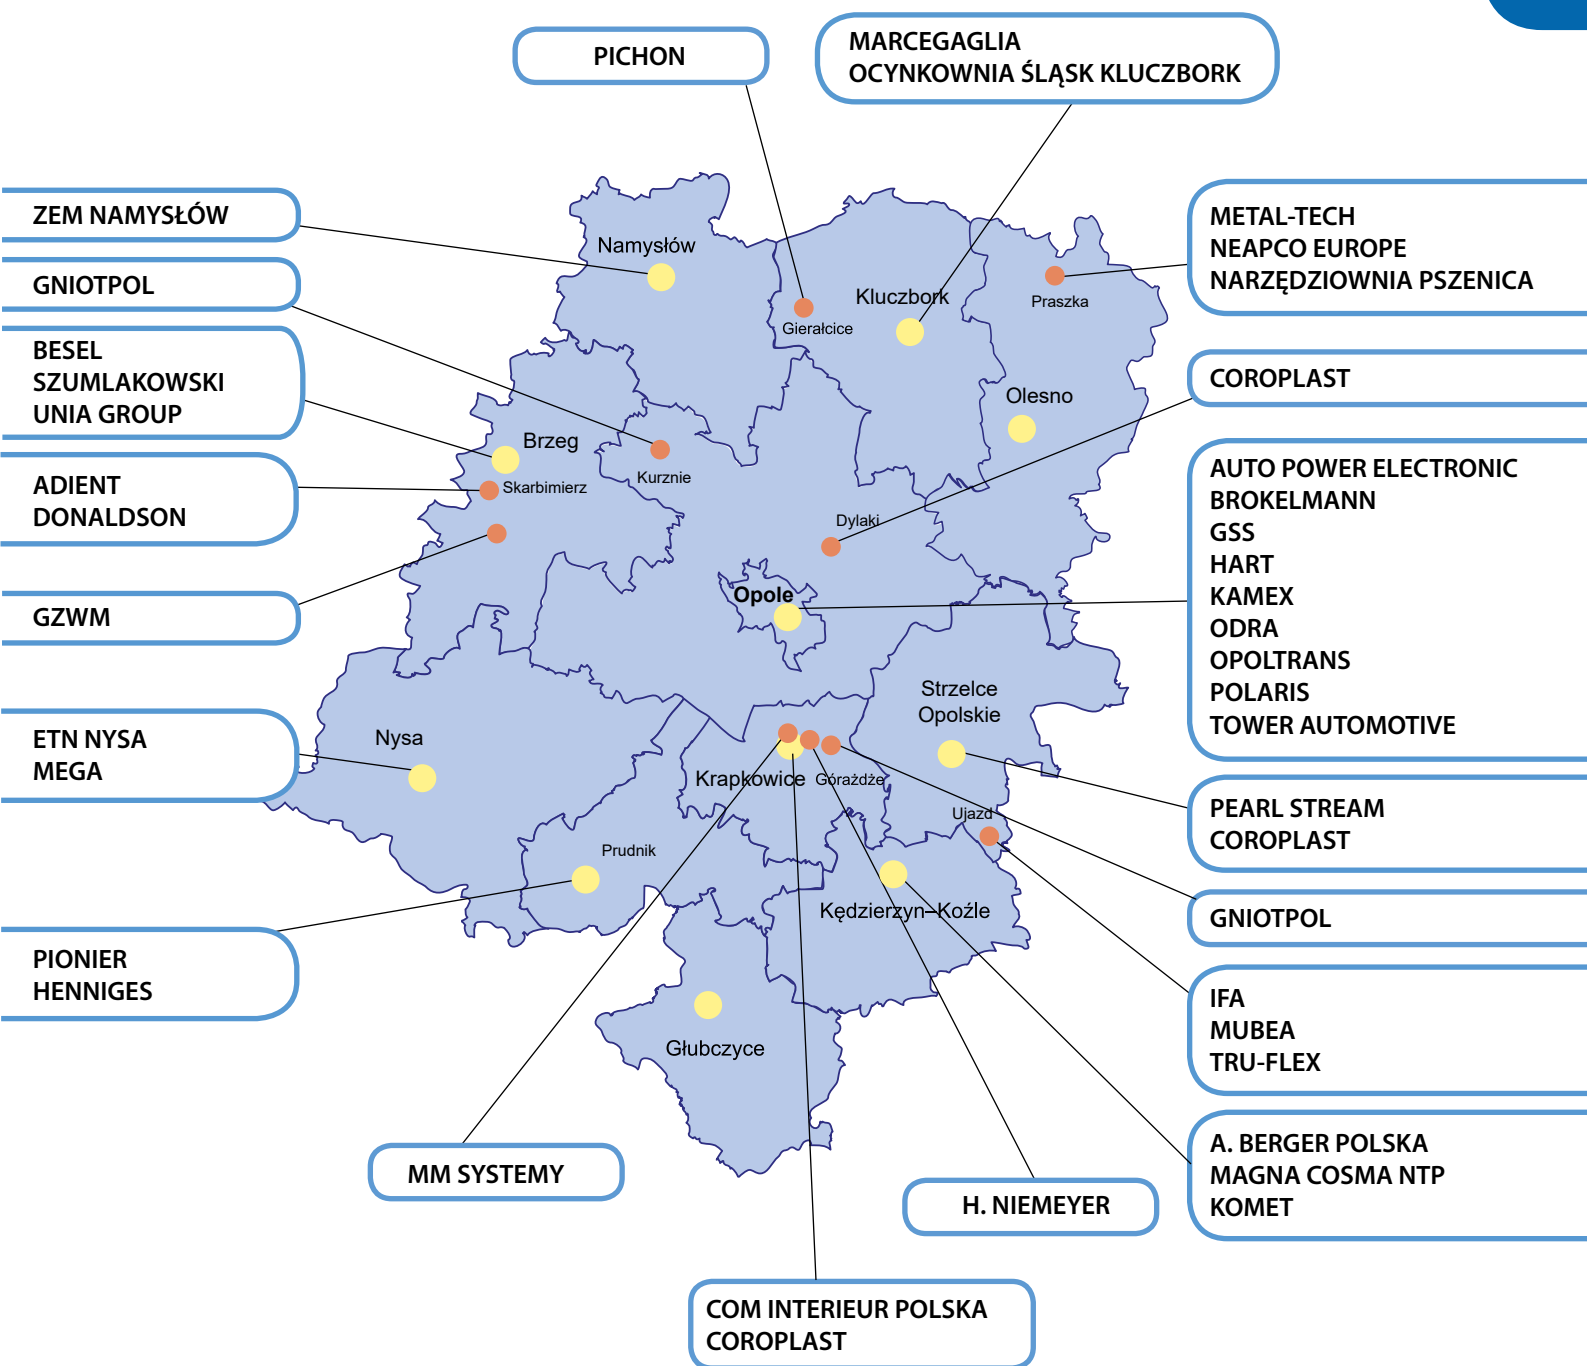

- running periodical surveys and analyses
- organizing workshops for HR and production managers, technical specialists
- organizing meetings on the exchange information and solving problems
- supporting development projects.

## American school for Polaris workers

In January 2014 the Public Elementary School in Opole will commence a study based exactly on the American curriculum. The 10-person personnel of Polaris management including their

families will arrive to Opole from USA and this individual study will embrace pupils - the children of the workers. - We have got already a contract and approved program of study and we are waiting yet for the final decisions of the Ministry of National Education – explains Irena Koszyk, director of Opole Local Authority Education Department. – We were striving for the best possible and most accurate implementation of American study pro-

gram here that is far more different than the English one available in Europe. We have been given a far -reaching assistance from one institution in Minneapolis where Polaris has its seat. Owing to this American way of study introduced in Opole the children of Polaris employees will be able to learn in exact the same manner as they used to do in USA with original school-books and teaching materials. It is worth noting that after a year they will be able to come back to States and continue learning on the same basis. In Opole they will be taught by two-language teaching personnel because part of the teachers have already attended language practices in USA. A native speaker from USA will also be available for the classes. If necessary the local authorities will secure elder pupils the study possibility in Public Gymnasium in Opole. All the expenses related to study of young Americans in Opole will be covered by local authorities.

## Favorable location for American Investments

**Stephen Mull, former Ambassador of USA**

I have visited 14 regions in Poland so far and Opolskie seems to be the most dynamic and business – friendly of them all. I am delighted to see its dynamism and youthfulness what according to my opinion makes this place a very promising location for American investments. Recent months we have seen launching new investments in the area by such recognizable brands as Polaris and Donaldson. Neapco and Mondelez have been already leading its production operation here for years. Polish-American economic cooperation has been developing in a very good way with promising prospects for the future. We have invested in Poland over 20 billion dollars for the last 25 years. American firms created in Opolskie about 1500 jobs and soon we expect Polaris launching its factory in Opole manufacturing quads and snow scooters. We have also a common and comprehensive interest concerning energy safety matters. Companies from USA may also be of substantial meaning when it comes to exploration and use of shale gas.

## American library in Opole

'America in your library' is the motto of the special program that has been launched in 2012 in Municipal Library in Opole. It encompasses many unique and interesting meetings that are inspired by the young and vigorous collective of librarians committed to this project. This initiative regards lectures, cultural activities and encounters with interesting people who want to share with others their knowledge and experience about America. Readers have an opportunity to regularly participate in a series of discourses led by travelers who are regularly backpacking their way through America. English-speaking computer games are held each summer. On the occasion of the Independence Day on the 4th of July the readers took part in a 'Coolinary Independence Day' with a culinary contest to bake the most delicious and original Independence Day Muffin. On the occasion of 'USA Flag's Day' a plastic contest was held for kids to picture American flag in the most beautiful and original way. They might show their fondness for books by taking part in a friendly rivalry under a motto 'I love books'. Of immense popularity are 'New York Evenings' – a series of travel and film lectures devoted to NY what is accompanied by the presentation of English-language films. Municipal Library in Opole is one of seven libraries in Poland that implemented a partnership program „america@your library®” prepared by American Embassy in Warsaw. By means of this smart undertaking the collection of books in Opole has been enriched by English-language positions such as encyclopedias, dictionaries and monographs concerning history, culture, geography, politics, sociology and literature of USA.

## American Chamber of Commerce in Poland

The American Chamber of Commerce in Poland seeks to be the leading voice for international investors in Poland, representing its member companies, the investor community at large and demonstrating the positive role that business and commerce play in the development of the country and society.

### Objectives:

- to provide a platform for American and multinational investors to discuss and identify common interests and exchange information regarding their economic activities in Poland
- to act as a representative body and collective voice for the views and common interests of the members before Polish and US business and governmental institutions
- to develop and maintain close contacts with Polish authorities to keep members informed on legal, commercial and economic objectives of Polish government and upcoming legislation
- to promote United States trade, investment, finance and industry involvement in Poland

## MARCEGAGLIA

The Marcegaglia manufacturing facility in Kluczbork, Poland was inaugurated in 2010 and is mainly dedicated to the production of carbon steel welded precision tubes for a wide range of applications. Marcegaglia Kluczbork also hosts a service center for strips and sheets.

The facility spreads over 80,000 sqm of covered surface devoted to manufacturing and storage, within an overall area of 450,000 sqm. It currently hosts 6 tubing mills working from hot rolled, cold rolled, pickled and galvanized carbon steel, 2 coil slitting lines, as well as a packaging line for strips and 2 cut to length machines for sheets.

The manufacturing system in Kluczbork is efficiently equipped to deliver just in time tube products to the market, assisted by a well-established pre-sales and after-sales service. The large warehouse area allows the plant to serve as the main logistics hub for the complete range of Marcegaglia flat and long products for the Central and Eastern European markets.

## Products

Tubes, profiles, strips and sheets - condenser, sandwich panels, brooms handles

## MM Systemy Sp. z o.o.

Muhr Metalltechnik and MM Systems is a group of companies headquartered in Wenden, Germany. The Polish plant was founded in 2012. in order to increase the scope of activities in Eastern Europe as a supplier for the automotive industry.

## Products

MM Systems focuses on the following areas:

- Production of press tooling, punching and drawing dies
- Mass production of pressed steel- and aluminum-made parts to be used in complex welded structures
- Production of pipe supports
- Manufacturing of seats for special vehicles

## Clients

Automotive companies

## Polaris Polska

Polaris Poland is building a quad and snow scooter factory in Opole of 100 million worth with the perspective of production capacity reaching 25 thousand quads a year. American investment is of 'greenfield' type and is being located on the 12 hectares area in Opole. The production hall itself is of 32 thousand m<sup>2</sup> area. The company guarantees a long-term and persistent interaction with subcontractors.

The production of ATV encompasses four stages: pressing, welding, painting and assembling with last three stages planned to be conducted in the factory in Opole. In the main hall there will be sections destined for press facility, paint shop, production lines and assembly zone with highly-advanced industrial robots. In the first stage of production Polaris Polska will employ 350 workers but within 5 years the company plans to create about 500 jobs. Polaris company launched its production activity in 1954 in Minnesota. 70 percent of its output are quads.

Since 1998 Polaris have been also producing Victory motor-bikes and two years ago the company bought the license for the legendary Indian brand.

## Products

The production in Opole planned includes RZR and Ranger models.

## Clients

The main selling market with 85 percent of production destined is North America. At present by means of the new factory in Opole the company is interested in seizing the markets in Europe and Russia.

## PPU SZUMLAKOWSKI

The company manufactures tankers for transportation of liquid hazardous materials subject to provisions of ADR and tankers for liquid neutral materials. The product range is very wide, the production includes semi-trailers tanks, trailers tanks and road tankers to transport of every possible medium in liquid form, with the capacity, technical specification and the equipment according to customer needs and existing regulations. The highest quality manufacturing process involving on advanced technology with the use of the highest quality materials, experience in manufacturing and large production range of tankers are a perfect combination, allowing the best response to the expectations of clients.

## Products/Usługi

SALES of new, used and repaired road tank trucks.

PRODUCTION of autotank trucks, semi-trailers and trailers for dangerous materials.

CARRYING supervision examinations, reconstruction of technical documentation that is required by TDT (Transport Technical Supervision).

REPAIRS of pressure and pressure-free tank trucks for transportation of dangerous materials, loose materials and foodstuffs.

CURRENT and after-accident repairs of tank semi-trailers and auto tank trucks..

MODERNIZATION of tanks of road tank trucks in accordance with DT and ADR

## The Opolskie Investor and Exporter Assistance Centre

- official partner of the Polish Information and Foreign Investment Agency (PAIIZ S.A.),
- first point of contact for those interested in investing in the voivodeship,
- the largest investment areas database in the Opolskie voivodeship,
- search of investment areas with specific requirements,
- information about funding,
- analysis of the socio-economic context,
- support in dealing with local administration, property owners, utility suppliers and existing investors,
- organization of visits to investment areas,
- post-investment care,
- systemic support for exporters.

We encourage you to contact us at the Opolskie Investor and Exporter Assistance Centre regarding all matters related to investment in Opolskie region.
