Opolskie region

**OPOLSKIE**  
FLOURISHING OPOLSKIE REGION

## Opolskie voivodeship – European region in Southern Poland

Opolskie voivodeship is a region that draws its strength from a multinational heritage. The most important trade routes in Central Europe crossed there their paths for centuries while local traditions were shaped by Germans, Poles and Czechs.

This extraordinary geographic position on the crossroad of different paths of cultures has a strong influence on the region from the economical aspect. Residents of Opolskie stand out for their diligence, commitment to tradition and openness to the world. Businesses generally praise the high level of work ethic, education and involvement of employees in local companies. A relatively high German minority (about 10% of the total population) also means a better connectivity to German, Austrian and Swiss markets.

Local administration and authorities have been successfully attracting investors in these years and are currently developing necessary infrastructure to attract even more. Attractive investment areas are available along A4 motorway, linking Opole with Wrocław, Katowice and Kraków, as well as the markets of Germany and Ukraine.

Opolskie voivodeship enjoys a reputation among foreign investors, particularly in the food processing, chemical, metal hardware and construction sectors. According to recent analysis by Deloitte, the region can expect new investment projects in the automotive, engineering, food, glass, chemical, paper and R&D sectors.

The region is renowned for its high life standard and flourishing academic center. Local residents and investors have a wide choice of active leisure and resting options.

## Logistics services in Opolskie voivodeship

Although the sector of logistics services in Poland is relatively young and highly diversified, the branch of forwarding goods is gaining importance in all aspects of economic life. Enterprises and institutions much more likely notice its usefulness, as one of the important tools of company management. For several years we have seen dynamic development of logistics centers and warehouses. Logistics has gained a brand new dimension. These processes are also noticed by the universities that have introduced to its offer many courses of education right in relation to logistics offering teaching of legal issues, international conventions and agreements concerning the transport of persons and things and finally conduct and organization of road transport.

Graduates gain not only practical knowledge of the technical aspects but also organizational and economic activities in the sphere of transport and domestic or international shipping. The labor market still absorbs specialists in optimization of the supply chain.

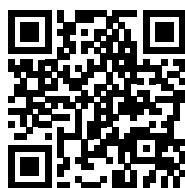

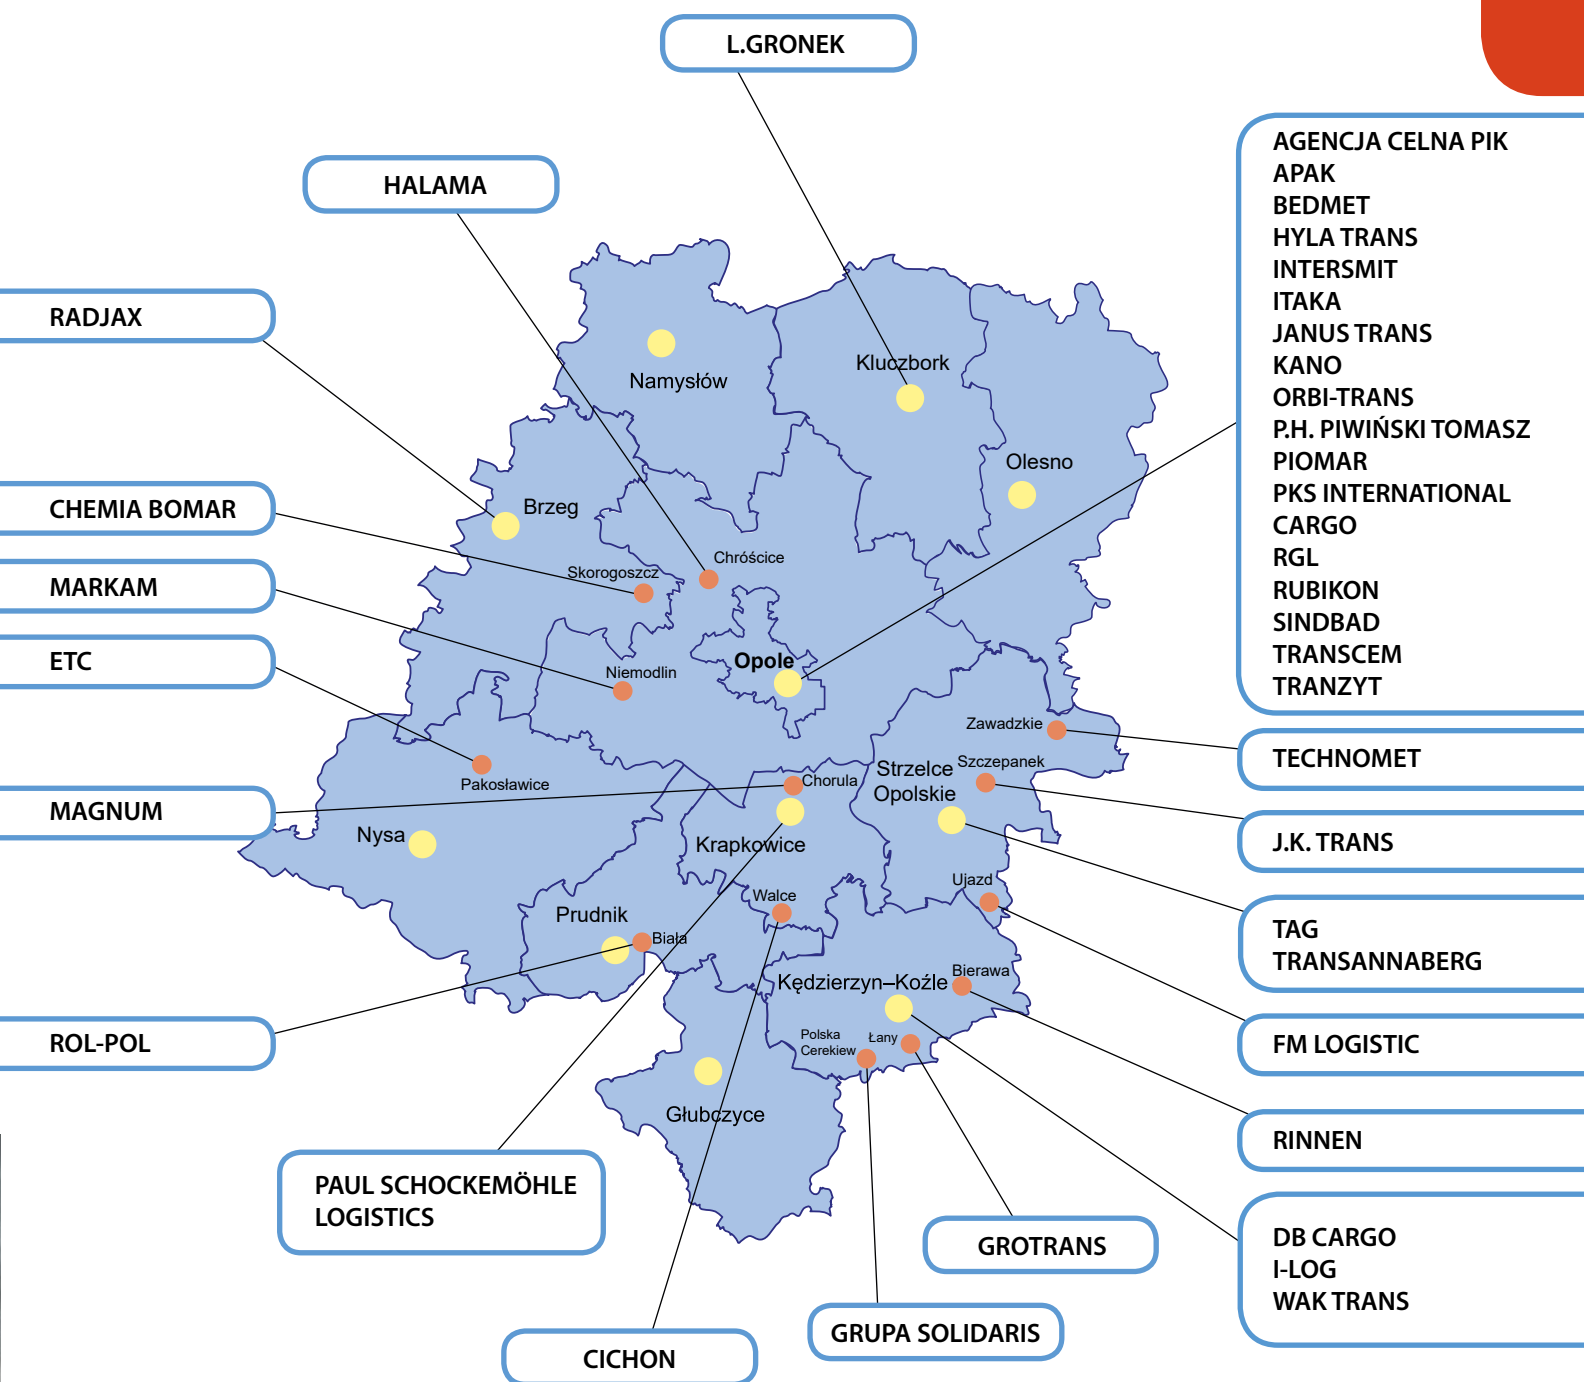

In recent years we have witnessed many changes in the market of logistics services. A positive phenomenon in international spedition is the exchange of camps by carriers. Enterprises taking care of its fleet pay increasingly more attention not only to the capacity of vehicles, but also to aspects affecting the environment and security of transport. Firms constantly increase the range of services offering not only the trucking, rail, sea and inland waterways, but also air transport.

Of growing importance are companies that expand activities in foreign markets, and it is this trend that is the most visible in our region. Today's large transport companies in opolskie are not only well equipped, but also cost-competitive in international transport. Seizing the opportunity they smartly took advantage to boost up its activity. Efficient organization of logistics processes, is today of crucial importance for the success of the company as a whole. Once it was enough to deliver the product to customers, today you have to do it in the right way, quickly and at a good price.

Quality  
+  
Experience

## Examples of companies in the region:

Transport **Piwiński**.pl

### PH. Piwiński Tomasz

#### Transport - Spedycja - Logistyka

It is a Polish company operating continuously since 2001 mainly specializing in the transport of oversized cargo. The wide range of their activities include logistics, transport of oversized cargo, pilotage, crane services and storage services. For several years they have gained experience in both Polish and Western Europe market. Their cars roamed the whole of Europe, from Portugal to Kazakhstan. Among their achievements are some very large projects eg. transporting several large factories such as: LG, Sharp, Toyota, Volvo, Bridgestone. Thanks to their transport services such plants as Zywiec, Heineken, Van Pur, Książ, Tatra, Okocim - could expand operations and increase production, while companies: Fuhrlander, Siemens, Repower - could provide energy from renewable sources.

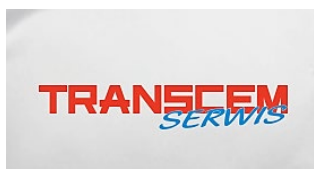

It offers a very diverse equipment: platform, telemegs, telesatles, semics or tiefbets that allow us to meet the increasingly sophisticated expectations, as well as technological requirements imposed by the manufacturers and designers. Width: 7 m, height 4.7 m and weight of 150 t - is only a substitute of our capabilities.

Apart from multifaceted transport abilities it also has a large technical support available. Additionally it offers highly specialized pilots providing external services. Their logistics department is ready to assist in obtaining permits for oversize rides in almost every corner of Europe, in the organization of ferries and sending your goods by sea or air to the whole world.

### TAG - SPEZIALTRANSPORTE & PROJEKTLOGISTIK Patricia Wiesiollek-Tkocz

TAG Company is an expert in the field of transport and design logistics. Its founder, Patricia Wiesiollek, belongs to the next generation of the family who manages the company TRANSANNABERG LOGISTIC. The two companies work closely together, making it the ideal partner matching to customer requirements. For years, TAG has developed from a company which has originally just one standard trailer of „Mega” to a modern and efficient transport company. TAG and TRANSANNABERG LOGISTIC now support most of Europe but the strongest relationship is developed with partners in Germany, the Netherlands and Belgium. It currently employs 40 people offering large, modern, specialized and diverse fleet.

Many years of experience, expert advice and know-how helped them to gain qualifications in large projects, wind turbines and all other modes of oversized or heavy transport. The basic premise of their business is the flexibility to adapt to market requirements. The firm closely observes the latest trends in the transport industry, and as a consequence develops individual and optimal logistics solutions that meet even very sophisticated demands of contractors.

## The Opolskie Investor and Exporter Assistance Centre

- official partner of the Polish Information and Foreign Investment Agency (PAIIZ S.A.),
- first point of contact for those interested in investing in the voivodeship,
- the largest investment areas database in the Opolskie voivodeship,
- search of investment areas with specific requirements,
- information about funding,
- analysis of the socio-economic context,
- support in dealing with local administration, property owners, utility suppliers and existing investors,
- organization of visits to investment areas,
- post-investment care,
- systemic support for exporters.

We encourage you to contact us at the Opolskie Investor and Exporter Assistance Centre regarding all matters related to investment in Opolskie region.
