OPOLSKIE
FLOURISHING OPOLSKIE REGION

Opolskie voivodeship – European region in Southern Poland

Opolskie voivodeship is a region that draws its strength from a multinational heritage. The most important trade routes in Central Europe crossed there their paths for centuries while local traditions were shaped by Germans, Poles and Czechs.

This extraordinary geographic position on the crossroad of different paths of cultures has a strong influence on the region from the economical aspect. Residents of Opolskie stand out for their diligence, commitment to tradition and openness to the world. Businesses generally praise the high level of work ethic, education and involvement of employees in local companies. A relatively high German minority (about 10% of the total population) also means a better connectivity to German, Austrian and Swiss markets.

Local administration and authorities have been successfully attracting investors in these years and are currently developing necessary infrastructure to attract even more. Attractive investment areas are available along A4 motorway, linking Opole with Wrocław, Katowice and Kraków, as well as the markets of Germany and Ukraine.

Opolskie voivodeship enjoys a reputation among foreign investors, particularly in the food processing, chemical, metal hardware and construction sectors. According to recent analysis by Deloitte, the region can expect new investment projects in the automotive, engineering, food, glass, chemical, paper and R&D sectors.

The region is renowned for its high life standard and flourishing academic center. Local residents and investors have a wide choice of active leisure and resting options.

Human Capital

Labor market in Poland and in Opolskie voivodeship are characterized by high efficiency and low operating costs. According to Eurostat, cost per hour in Poland is 7.4 EUR, while the average in EU is 23.4 EUR and for the Euro area is 28 EUR. The average wage in Opolskie is 91.2% of the national average. As is shown by a research of the European Federation of Employers (FedEE), Poland is the most attractive country for investment in terms of human resources in Europe.

Metal hardware, machinery and automation industry in Opolskie voivodeship

Metal hardware, machinery and automation industry along with food processing and chemical production is one of the fundamental components of the voivodeship's economy. Ferrous and nonferrous metals castings, metal machining, steel-made support structures, tools, industrial equipment, machinery, advanced automation and systems are marketed by many companies in the region. The highest concentration of companies can be seen near the towns: Ozimek, Zawadzkie, Kędzierzyn-Koźle, Nysa, Kluczbork, Opole and Brzeg.

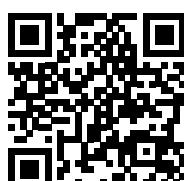

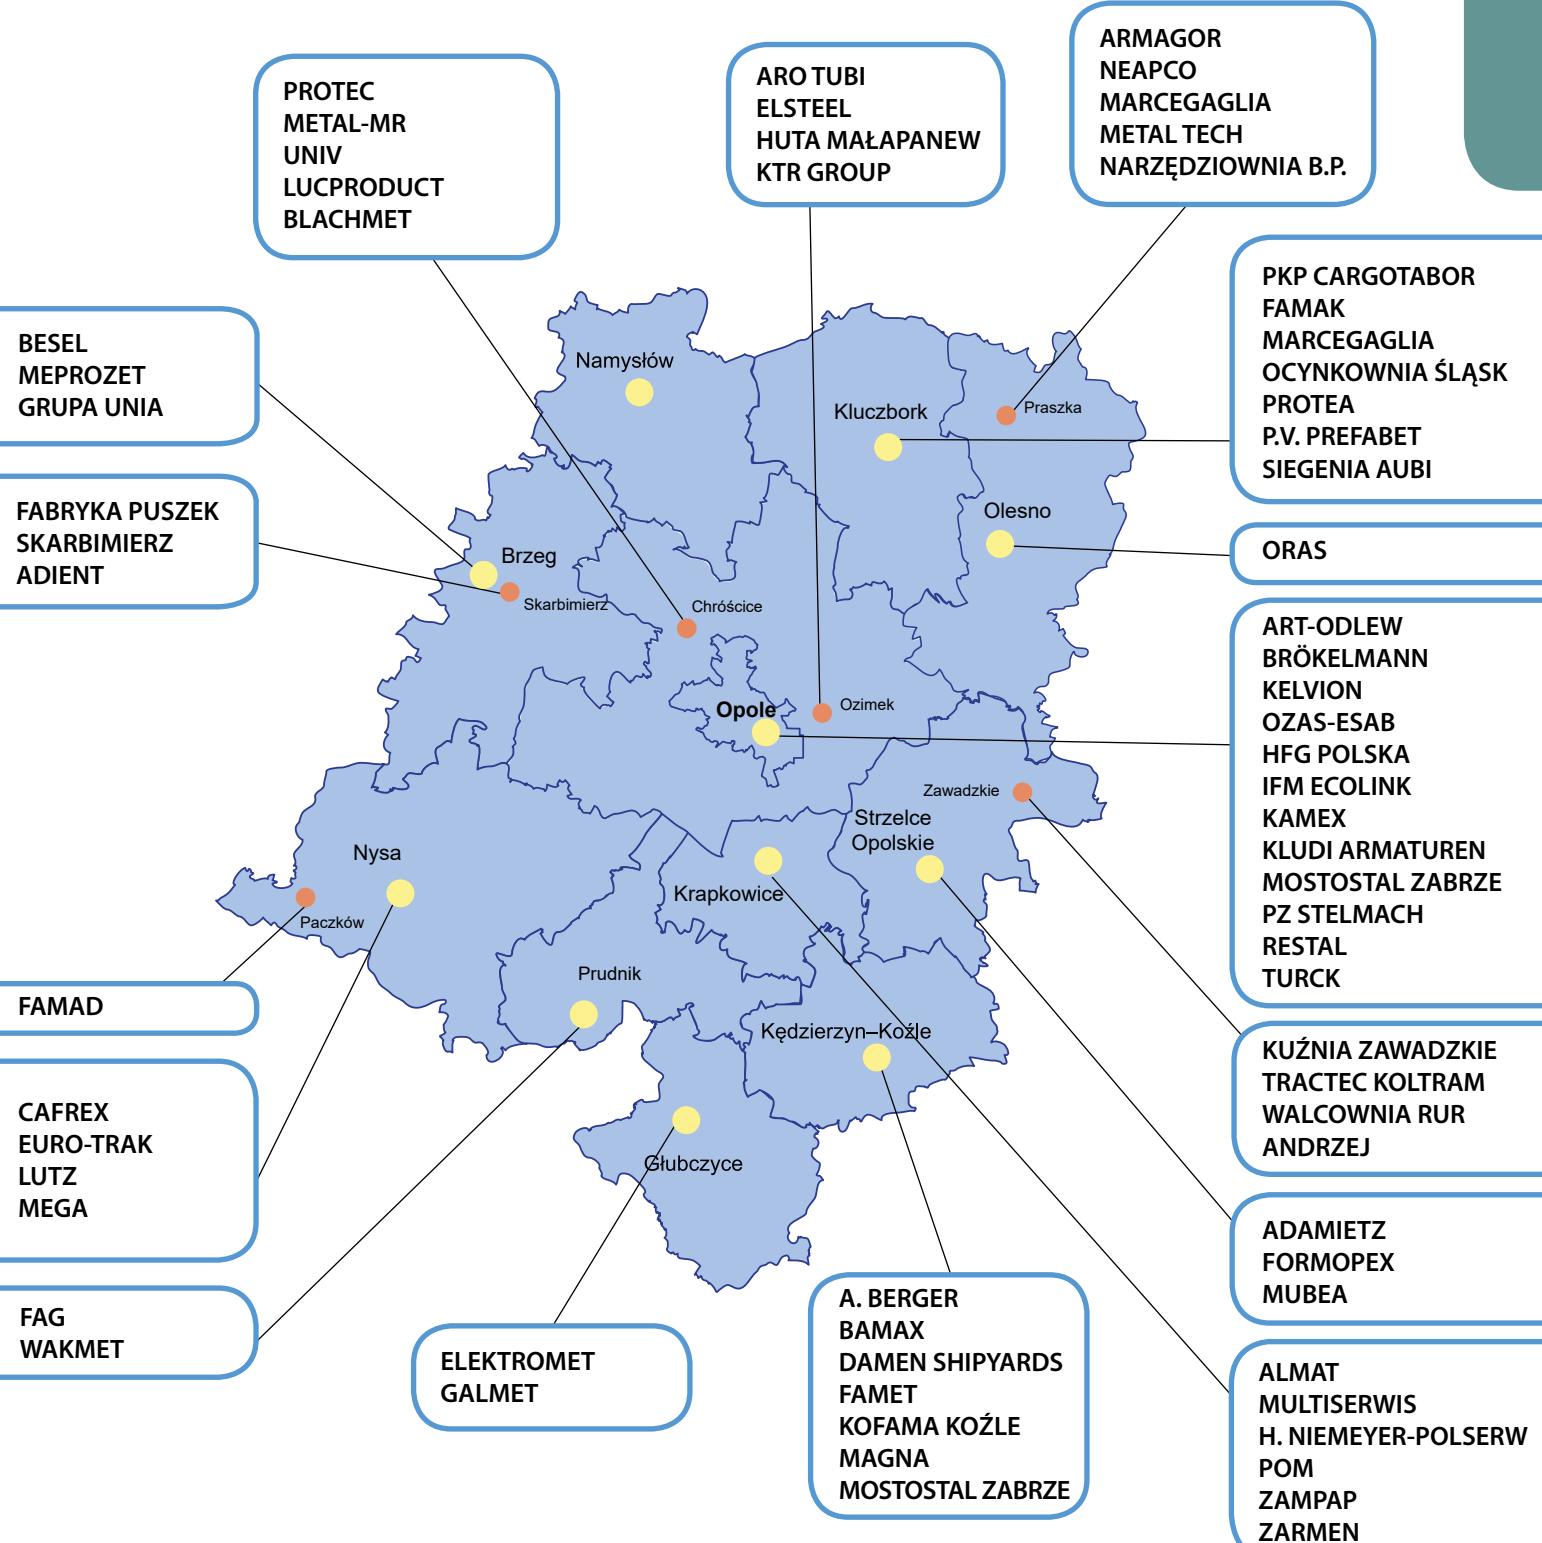

The capital structure of the companies is variegated. In Opolskie voivodeship there are subsidiaries belonging to international groups such as Marcegaglia, Adient or Brökelmann Polska and companies with mainly domestic capital like Stegu, Filplast, Elektromet, Galmet or Okpol Rialex, Narzędziownia Pszenica and others. A large part of the local manufacturers are export oriented.

The sector is locally supported by a well-developed road and rail infrastructure, as well as by a favorable geographical location in the middle of Europe, which simplifies the logistics chain and reduces the cost of transporting the goods to customers.

A large, rectangular metal sheet with numerous holes of different sizes and shapes, including several large circular holes and several smaller, elongated oval holes. The metal has a textured, slightly reflective surface. A blue rounded rectangular box is overlaid on the upper right portion of the sheet. Inside the box, the word "QUALITY" is written in bold blue capital letters, followed by a small blue plus sign, and then the word "EXPERIENCE" in bold blue capital letters.

Fermstal BFM

Fermstal-BFM

The company specializes in producing light and heavy steel structures and components. The assets of the plant are: qualified staff, production capacity of 250 tons per month, production halls with an area of 15000 m² and its machinery park.

Products

- Enclosures for electrostatic filters, modular and fabric filters, equipment related to environmental protection
- Tanks
- Diffusers
- Components and enclosures for crushers
- Pipes and ducts
- Trailer and crane frames
- Steel chimneys
- Steel constructions according to din 18 800: 2000, pn-b-06200: 2002
- Stairs, platforms and railing
- Fan enclosures

Clients

Energy sector, chemical industry, environmental protection, construction and other companies

FORMOPEX

FORMOPEX Sp. z o.o.

The company specializes in manufacturing and installation of steel structures. The company pursues the objectives and business tasks within the ADAMIETZ group. The company began operations in April 2010. The primary activity is the production of carbon steel structures and their assembly on construction sites. The experience and work organization of the staff assure state-of-the-art manufacturing methods.

Products

- Carbon steel structures
- Steel components for various types of construction machines, overhead cranes, welding assistive devices, tanks, etc.
- Steel structures for special purposes, e.g. for power plants, hydraulics, etc.
- Steel working services

Clients

Energy industry, manufacturing and institutional sector

Certificates

ISO 3834, EN 1090

Galmet Sp. z o.o. Sp. K.

The company has been operating on the market for 30 years. It specializes in production and marketing of heating systems and components. The product line consists of: electric water boilers, central heating boilers, heat exchangers, heat storage tanks, buffer tanks, ecological heating boilers, solar collectors and heat pumps. The company employs over 700 people, while the manufacturing takes place in production halls with an area of over 25.000 sq m.

Products

- Electric water boilers,
- Central heating boilers
- Bivalent heat exchangers
- Combined heat storage tanks,
- Buffer tanks,
- Eco boilers
- Solar collectors
- Heat pumps

Clients

Heating industry, construction industry, B2C

GNIOTPOL Trailers Sp. z o.o.

The company is one of the leading Polish manufacturers of trailers and truck bodies. Production capacity of 1200 transport units per year is being implemented in two plants in Malnia and Kurznie, which employ a total of 200 people. The main product is the lightest in Europe spatial transport sets, which are a pillar of exports to western markets.

Products

- Cubic long-distance sets of 12-40 tons GVW
- Trailers and semi-trailers of special use.
- Individual transport units.

Clients

Transport companies
Dealers of trucks
Manufacturing companies with their own fleet

Certificates

ISO 9001

HUTA MAŁAPANEW Sp. z o.o.

The company exists since 2001 and represents the operational continuation of Huta Małapanew Ozimek. It is one of the largest domestic manufacturers of steel castings. Castings are made of about 200 different grades of cast steel and iron according to the following standards: BS / EN, DIN, ASTM, GOST, BS or based on other customer requirements. The weight of a single casting may be from 5 to 12.000 kg. The foundry can produce on mass series or single product basis. Castings are available raw or machined. Huta Małapanew has implemented Integrated Management System meeting the requirements of ISO 9001: 2008 and ISO 14 001: 2004.

Products

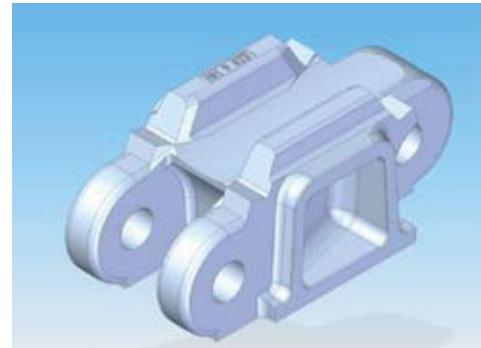

- Raw and machined castings
- Mill rolls
- Parts of handling and loading equipment
- Specialized castings made according to customer specifications and design

Clients

The clients are mining, metallurgical, cement and lime industry, machinery, energy, shipbuilding companies, etc. Part of the production is exported.

PROTEA Sp. z o.o. – oddział Kluczbork

The company was founded in 2001 in Gdańsk. It offers comprehensive solutions in the field of machinery and equipment for off-shore platforms, as well as their warranty and post-warranty service, including a 24/7 phone assistance. In 2004 it merged with NTD company from Olesno, allowing to expand the scope of design and calculation. As a result, in January 2008, the company has put into operation a new plant in Ligota Góra near Kluczbork. PROTEA has a representative office in Vestnes, Norway, and is represented by agents all over the world.

Products

- Offshore cranes
- Gantry cranes
- Offshore hydraulic winches
- Offshore pneumatic winches
- Pipe laying systems

Clients

Off-shore sector

Certificates

ISO 9001, ISO 14001, OHSAS 18001

Przedsiębiorstwo Usługowo Produkcyjne POM Sp. z o.o.

The company operates in the metalworking and construction sectors since 1990. The core activities include comprehensive services related to industrial equipment fabrication and installation at the customer's site. The company specializes in solutions for industry, coke, metallurgical, hydro-technical (locks), construction, railway and automotive industries. There is an option of „turnkey” projects delivery - together with the design, execution and installation. The company performs complex projects in Poland (among other things, The Exhibition and Congress Centre in Opole, The Opole flood protection) and abroad. It employs about 250 workers.

Products

Design, construction and installation of industrial equipment and structures

Clients

Coke, metallurgical, construction and railway industries

Certificates

The Opolskie Investor and Exporter Assistance Centre

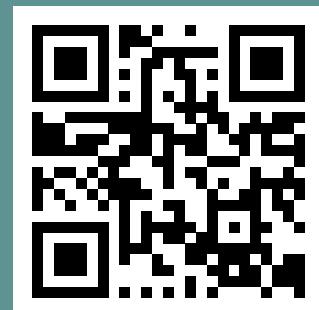

- official partner of the Polish Information and Foreign Investment Agency (PAIiZ S.A.),
- first point of contact for those interested in investing in the voivodeship,
- the largest investment areas database in the Opolskie voivodeship,
- search of investment areas with specific requirements,
- information about funding,
- analysis of the socio-economic context,
- support in dealing with local administration, property owners, utility suppliers and existing investors,
- organization of visits to investment areas,
- post-investment care,
- systemic support for exporters.

We encourage you to contact us at the Opolskie Investor and Exporter Assistance Centre regarding all matters related to investment in Opolskie region.
